GROWING PERENNIALS

The soil should be well worked in specially prepared beds 2' to 2½' deep with good drainage. Plant food and plenty of humus are necessary ingredients for successful perennial flower growing. Most perennials respond best if planted in a sunny location.

The average planting distance for perennials is 1 foot apart. Vigorous growers like peonies and mallows require as much as 3 feet.

Iris should be planted with the roots below the surface of the ground and the rhizome just on the surface.

Peonies should be planted with the tips of the buds just below the surface of the ground (about 1"). Peonies will not bloom well if planted too deeply or if deprived of ample plant food.

Plants, on which the leaves spring from a crown, should be planted with this crown just at the dirt line.

Plants with a fleshy root such as Hollyhocks, should be planted with the tap root straight down and the bud just below the surface of the dirt. In all planting, spread the roots out naturally and do not crowd. Bring the soil in contact with all roots and press firmly. Water thoroughly.

NOTES

OUR AIM

We believe that the best way to build a lasting and pleasant business is to produce the best plants possible and to sell them at a reasonable price.

When you receive a shipment of plants from **SPRINGBROOK GARDENS, INC.** they will be carefully packed, all of an even grade of the very finest quality, freshly dug from the fields. Throughout the flowering period we go through our nursery removing any plant that is not true to name. At digging time when your order is filled, we use only plants which come up to our own exacting standards.

To maintain high standards, the income per acre is reduced but we know that prices must be reasonable to encourage larger plantings of our products. We depend a great deal on our customers recommending our products to others who are interested in flowering plants.

Your continued good will is essential to our continued success.

Boxing and Packing Charges

All boxing will be charged at cost.

Extra charge for potted plant material which is not listed in pots in catalogue.

Balling and Burlapping

All plant material which should be moved B&B is included in the price. Any material not so marked is so marked in the catalog and the cost of balling can be supplied B&B at 35c extra per plant.
